

Incredible Years Experience in Norway

Siri Gammelsæter,
IY Clinical Trainer, Regional Centre for Child and Youth Mental
Health and Child Welfare, Norway

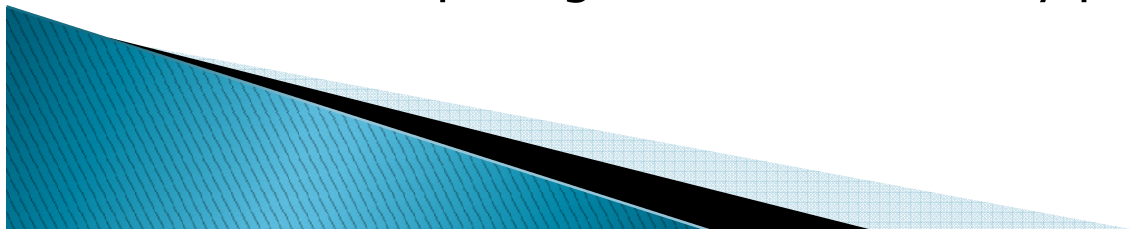

- ▶ 1997–Norwegian Research Council conference
- ▶ New methods for working with children and youth with behavioral problems
- ▶ Public funding of implementation of three programs IY, parent management training (PMT) and Multi Systemic Therapy (MST)
- ▶ Covered the age range of 3–18 years

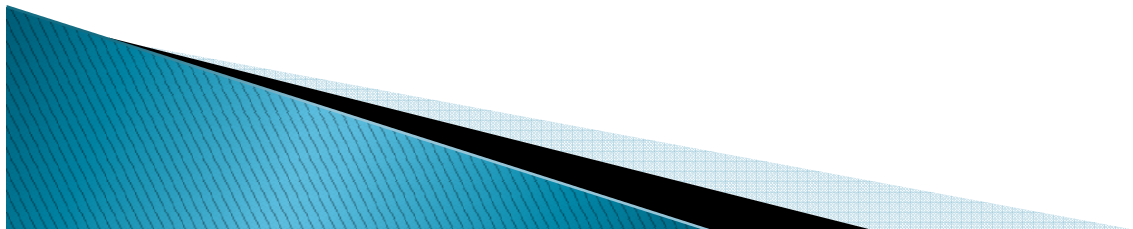

Implementation process in Norway

- ▶ 1999: Start of the first parent groups and training of group leaders
- ▶ 2000: Start of the first Dinosaur-groups and training for group leaders
- ▶ 2002 – 2005: Clinical trial. RCT of parent- and Dinosaur groups
- ▶ 2005 – today: Dissemination period
- ▶ 2007 Piloting the universal parent program
- ▶ 2007 – 2008: Universal prevention trial. RCT of universal parent program
- ▶ 2008: Piloting the classroom management program
- ▶ 2009 – today: School and kindergarten trial. RCT of school and kindergarten programs
- ▶ 2010: Piloting The attentive parenting program (universal)
- ▶ 2012 – today: Piloting The baby program
- ▶ 2012: Preparing a RCT of The baby program

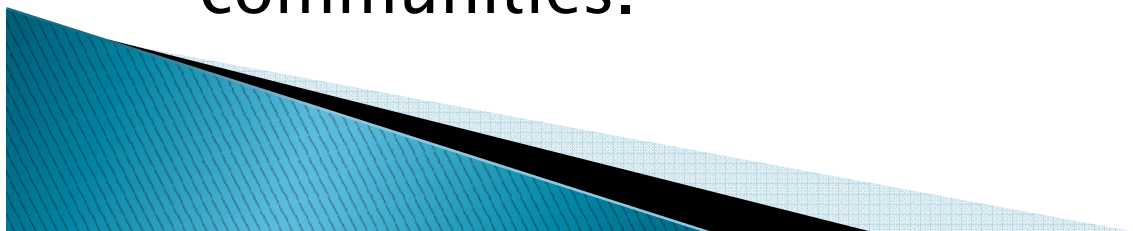

IY in Norway

- ▶ Nationwide implementation
- ▶ Financed by Directory of Health
- ▶ University of Tromsø in charge of implementation, in collaboration with university of Trondheim and Uni Research Health Bergen
- ▶ Mentors and peer coaches in different parts of the country
- ▶ 15 years later–the IY programmes are working well in Norway –even if the programs come from a different culture

The Incredible Years

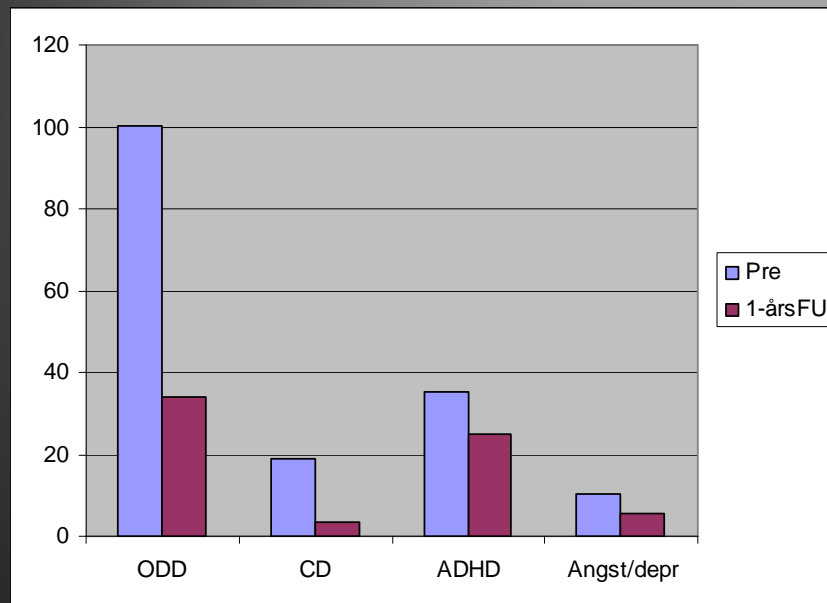

- ▶ A series of interlocking evidencebased programs for parents, children and teachers.
- ▶ The goal of the programs is to treat and prevent young children's behavior problems
- ▶ Recommended in the Norwegian National Guidelines for ADHD, as parent training for young children with ADHD
- ▶ The programs have been researched for 30 years
- ▶ The programs are used world wide in mental health services and as preventive programs in communities.
